

COLORaktiv 3000 (BV)

Plasticizer with efflorescence reducing agent for the face concrete according to EN 934-2:T2
Product No.: 200006000

Product Information:

Properties:

- reduces efflorescence
- avoids sticking to the ram
- plasticizing

Application:

face concrete

The quantity to use depends on the required effect, cement grade and type of the concrete. Please call us for technical advice.

Dosage:

Recommended dosage: 0.2 - 1.0 mass % of the binding agent content

It is added simultaneously with the mixing water into the concrete mix or directly onto the dry mix. Prior to use, a suitability test according to DIN EN 206-1 or any applicable standards or norms relevant in your country is required.

Specifications:

Appearance:	liquid
Colour:	blue
Density:	1.00 ± 0.02 g/ml
Air Pore Content:	5.8 % above the control mixture according to EN 934-2: T2

Storage:

Protect against frost, direct sun and dirt. Under normal storage conditions (closed container, 20 °C) minimum shelf-life 6 months. If stored > 30 °C and/or after a storage time of > 2 months the product has to be stirred prior to use.

Packaging:

container approx. 1000 kg, drum approx. 210 kg, can approx. 20 kg
Please ask for exact package sizes.

Safety Rules:

See EC safety data sheet.
The product should only be used with suitable protective gloves (EN 374) and safety goggles (EN 166).
When used, ensure good ventilation (5 to 15 air exchange per hour).
