

# HYDROPLUS

Efflorescence Reducing Agent for Coloured and Grey Concrete Products  
Product No.: 200014000

## Product Information:

### Properties:

- reducing the efflorescence tendency and the water penetration
- improved homogeneity
- improved pre-compaction
- excellent green bond
- good early strength
- more brilliant colours due to improved mixing processing

### Application:

for face concrete and one-layer concrete products

Is added together with the aggregates or, if the aggregates are highly absorbent, to the finished concrete mix. Spraying the admixture for easier and quicker distribution is recommended.

### Dosage:

Recommended dosage: 0.1 - 1.0 mass % of the binding agent content

The quantity to use depends on the required effect, cement grade and type of concrete. Please call us for technical advice.

Prior to use, a suitability test according to EN 206-1 or any applicable standards or norms relevant in your country is required. If used together with other concrete admixtures, a compatibility test is imperative.

### Specifications:

Appearance: liquid  
Colour: white  
Density: 1.03 ± 0.02 g/ml

### Storage:

Protect against frost and dirt. Under normal storage conditions (closed container, 20 °C) minimum shelf-life 6 months.

### Packaging:

Container 1025 kg, drums 210 kg, can 20 kg  
Further delivery quantities on request

### Safety Rules:

See EC safety data sheet.

The product should only be used with suitable protective gloves (EN 374) and safety goggles (EN 166).  
When used, ensure good ventilation (5 to 15 air exchange per hour).
